

Looking for sensor acquisition solutions?

Pressure, force, temperature, length, noise or vibration:
for the acquisition of such various sensors you will find an
endless list of manufacturers.

However, for applications in industrial environments, make sure
to use solutions with interference protection: This is the only way
to ensure that your measuring system supplies reliable data.

Benefit from more than 20 years experience in making
interference-free and industry-dedicated products.
Focus on our innovative range of solutions for sensor acquisition.

A single manufacturer – various, robust solutions

It is better to invest time and money in new projects than in the maintenance of ongoing measuring systems. And it is better to rely on just one partner for sensor acquisition.

ADDI-DATA offers you reliability and diversity. Whether PC-based or distributed through Ethernet, we have the solutions which suit your requirements.

Measurement electronics placed near the sensors

Distributed, intelligent I/O modules, IP 65 / IP 40

Fast measurement with high data volumes

PC plug-in boards with IPC

Distributed data acquisition in real time

PCI plug-in boards with compact PAC* system

*Programmable Automation Controller
