

Digital I/O Board, 32 Isolated I/O Channels, 24 V ADDINUM PA 1500

**16 input channels 24 V,
incl. 14 interruptible**

**16 output channels,
24 V, 500 mA**

Optical isolation 1000 V

Input and outputs filters

Watchdog

3 timers/counters

Windows NTTM

Features

- 16 opto-isolated input channels, 24 V, including 14 interruptible
- 3 software-programmable counters/ timers
- 16 opto-isolated output channels, 10 to 36 V, output current 500 mA
- Timer-programmable watchdog for the reset of the outputs to 0
- Diagnostic report through status register in case of short-circuit, overtemperature, voltage drop or watchdog
- Interrupt triggered through watchdog, timer, error
- Separate grounds for the inputs and the outputs

Safety features

- Optical isolation 1000 V
- Protection against fast transients (Burst), overvoltage, electrostatic discharge and EMI

Input channels

- Voltage reversal protection, input filters

Output channels

- Short-circuit current for 16 outputs ~ 3 A typ.
- Short-circuit current per output ~ 1.5 A typ.
- Self-resetting fuse
- Overtemperature and overvoltage protection
- 24 V power outputs with protection diodes and filters
- Special output capacitors minimise electromagnetic emissions
- External voltage supply filtered through a protection circuitry
- Shutdown logic when the ext. supply voltage drops under 5 V

EMC tested according to 89/336/EEC (CE certification)

- EN 50082-2, EN 55011, EN 55022

Applications

- Process control
- Industrial measurement
- Acquisition of sensor data
- Signal analysis
- Machine interfacing
- ...

Software

Windows NT 4.0 (and 3.51): API as a 32-bit DLL + SYS driver.

Example for Visual Basic 4.0 (32-bit version).

Delphi 2.0 Interface, Microsoft C Lib, Borland C Lib

Windows 95: API as a 32-bit DLL + VXD driver

Example for Visual Basic 4.0 (32-bit version).

Delphi 2.0 Interface, Microsoft C Lib, Borland C Lib

Windows 3.11: API as a 16-bit DLL.

Example for Visual Basic 3.0 for Windows 3.11

DOS: API in ANSI C for Borland and Microsoft C, Turbo Pascal 6.0 and 7.0, Visual Basic.

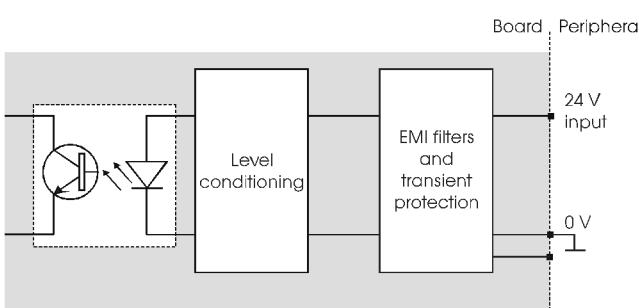

Source code supplied (ANSI-C)

Examples for Borland C, Microsoft C, Turbo Pascal, Visual Basic DOS

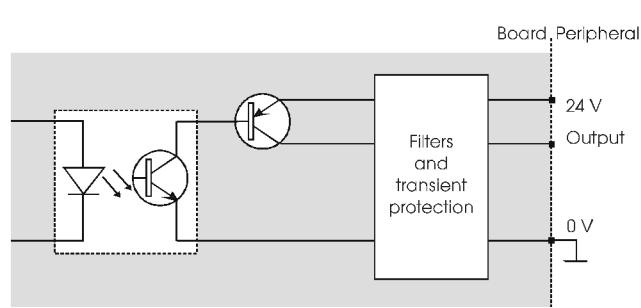

Current driver list

Specifications

Digital input

Number of input channels :	16 (type common ground according to IEC 1131-2)
Isolation:	Through optical couplers, 1000 V
Interruptible inputs:	14
Interrupt lines:	IRQ 3, 5 for XT, IRQ 10, 11, 12, 14, 15 for AT
Interrupt comparison logic:	AND and OR mode; OR priority
Nominal voltage:	24 V
Input current at 24 V:	6 mA typ.
Logic input level:	
U_H max:	30 V / current 9 mA typ.
U_H min.:	17 V / current 2 mA typ.
U_L max.:	14 V / current 0,6 mA typ.
U_L min.:	0 V / current 0 mA typ.
Signal delay:	70 μ s (at 24 V)
Maximum input frequency:	5 kHz (at 24 V)

Digital output

Output channels :	16 outputs, optically isolated to 1000 V
Output type:	High-Side (load at ground) according to IEC 1131-2
Nominal voltage:	24 V
Supply voltage:	10 to 36 V, min. 5 V
Max. current for 16 outputs :	3 A typ.
Output current/Output:	500 mA typ.
Short-circuit current/	
Output Shut-Down at 24 V,	
$R_{load} < 0,1\Omega$:	1.5 A
$R_{DS\ ON}$ resistance:	0.4 R max.
Switch-on time:	I out=0.5 A, load = resistor: 120 μ s
Switch-off time:	I out=0.5 A, load = resistor: 40 μ s
Overtemperature (Shut-Down):	170°C
Temperature hysteresis:	20°C

Safety

Shut-down logic:	When 24 V ext. supply voltage drops below 5 V: the outputs are switched off.
Counters or timers:	Diagnostic: status bit or interrupt to the PC

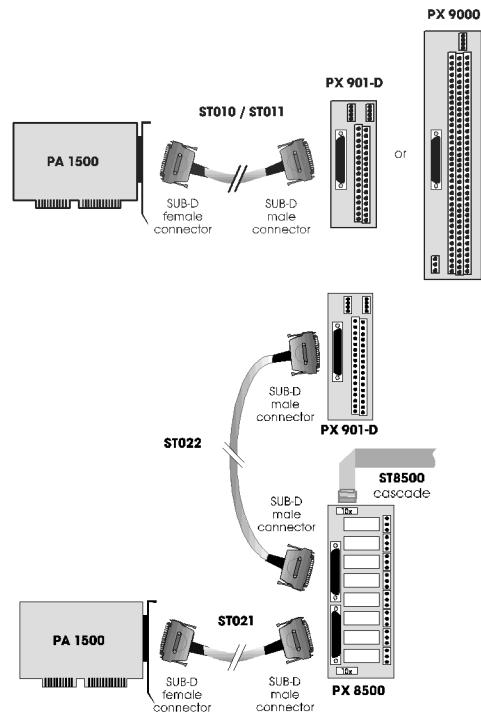

Noise immunity

Test level:	- ESD: 4 kV - Fields: 10 V/m - Burst: 4 kV - Conducted radio interferences: 10 V
-------------	---

Physical and environmental conditions

Dimensions approx.:	156 x 99 mm
System bus:	ISA
Space required:	Short board, 1 AT or XT slot
Operating voltage / Current:	+5 V, $\pm 5\%$ from the PC / 150 mA ± 10 mA
Front connector:	37-pin SUB-D male connector
Temperature range:	0 to 60°C (with forced cooling)

Connection

Ordering information

ADDINUM PA 1500

Digital I/O Board, 32 Isolated I/O Channels, 24 V
Incl. technical manual and software drivers

Connection:

PX901-D:	Screw terminal board
PX901-DG:	Screw terminal board for DIN-rail
PX9000:	3-row screw terminal board for DIN-rail
PX8500:	Relay board for DIN-rail, cascadable, see page 94-95
ST010:	Standard round cable, shielded, twisted pairs, 2 m
ST011:	Standard round cable, shielded, twisted pairs, 5 m
ST010-S:	Same as ST010, for high currents
ST021:	Cable between board PA 1500 and PX 8500, shielded, twisted pairs, 2 m
ST022:	Between PX 8500 and PX 901
